

Profile

A passion for creative problem solving and affirmative attitude towards learning and personal development has enabled me to develop a well-rounded skill-set.

I have six plus years of design experience working for both companies and as a Freelancer. For the last 4 years I have been fully immersed in agency life, designing creative and corporate publications at Beyond Publishing. Overall, this has been a fantastic experience that has enabled me to develop better accuracy, organisation, communication and patience whilst working on projects for great clients within a cohesive team.

I have come to rely on my ability to think on my feet and thrive in creative environments where ideas are valued, shared and built upon to achieve solutions. The experience of being surrounded by enthusiastic, knowledgeable people and the accelerated learning found when working in such environments I find invaluable.

I'm looking for a new challenge and career change to front-end development in a junior position that gives me the opportunity to diversify my skill-set and continue to grow both personally and professionally.
